#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

1) Responsive to communication(s) filed on \_\_\_\_\_.  
 2a) This action is FINAL.                    2b) This action is non-final.  
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Drawings*

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character not mentioned in the description: It is not clear what reference character 2 in Figures 1, 2, and 3 represent. On page 14 of the specification, part (1) has been labeled a nozzle as well as a joint. Please check the drawings/specification, and make appropriate corrections.

Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear what limitations are imposed on the number average molecular weight ( $M_n$ ) of the polymer.

***Claim Objections***

4. Claim 6 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim, or amend the claim to place the claim in proper dependent form, or rewrite the claim in independent form. Claim 6 does not limit further the subject matter of claim 4. Please check claim dependency and amend appropriately.

***Allowable Subject Matter***

5. The following is a statement of reasons for the indication of allowable subject matter: Claims 1, 2, 4, 5, and 7-11 are allowable over the closest reference, Oshima *et al.* (U.S. 6,870,015). The prior art relates to a process of making ethylene-based polymer in the presence of a catalyst comprising a group 4 transition metal component, inert support, organoaluminum, and a monofunctional organic halide comprising one -OH or -NH<sub>2</sub> group. The reference does not teach or suggest use of a multifunctional organic halide of formula (Q<sup>1</sup>)<sub>o</sub>-R-(Q<sup>2</sup>)<sub>p</sub> as recited in the instant claims, and the reference does not disclose C<sub>2</sub>/C<sub>4-10</sub> alpha olefin copolymer described by the instant claims. One of ordinary skill in the art would not have expected the claimed polymer products to be made by the process shown in the prior art because the process is different from that recited in the claims.
